Thanks – let's talk Monday or Tuesday next week about who in UIC can take on coordination of EJ and CEA. Once we have that person(s) identified, we can work with them to set those parts of the schedule.

See my suggested revisions in yellow. Since we don't have folks identified yet to coordinate completion of the EJ and CEA work, should we push these dates another two weeks into the future?

Hi Douglas –

Have you had a chance to look at this more detailed schedule? I'd like to share with Kimi and Mike so they know what we have in mind and get their input. ORC management also asked to meet next week to better understand our needs for Dewey, so I'd like to provide them with this schedule today or Monday so they have time to review prior to that meeting. I'll make sure you're on the invite when it comes out.

Thanks,
Sarah

Rick had no comments and Valois and Omar offer a few below. I will take a closer look on Monday.

From Omar:

I reviewed the timeline and will adjust my schedule as needed.

The schedule's Tribal Consultation - Mail Consultation Letters END DATE needs to be adjusted; it's currently Jan 31 as the END DATE.

Other than that, I will do my best to meet the deadlines.

Regards,

Omar Sierra-Lopez
Physical Scientist (Environmental)

I think the timeframes look good for everything except the mailing of the CRST letter and the due date for mailing the letters to the 35 remaining tribes. I had that due date at the end of Feb. I haven't had a chance to read through the categorized comments yet, so I will need more time for that.

I talked with Sarah yesterday about our meeting with Darcy on Monday. She took the time to follow up with Darcy this week to re-emphasize the necessity of having more time beyond 6/30/20 to complete our work. In response, Darcy did not agree to a later date, but did agree to take a wait and see approach (for now) given the continued uncertainty around some of our work (e.g., resolution of issues with NRC, quality of RTC document from Cadmus, etc.). Accordingly, we don't expect her to convey to Powertech a firm date for final permit issuance at this point.

Sarah also asked that we not work backwards from August 24th when commenting on the attached timetable. Rather, she asked that we look at each major task listed and determine if the time allotted aligns with our expectations (note: this document is primarily based on the two page document Valois drafted that we attached to the invite for Monday's meeting).

Let me know if you have questions, etc.

Douglas

Subject: DB schedule

Hi guys –

Here's a first draft of a schedule organized by task. I'd appreciate it if you could review it and revise any dates that need to be adjusted, or add any interim steps that you think are important. You'll see the ESA section needs to be filled out, and the NRC coordination is a little unclear still pending upcoming meetings.

I don't think we need to bring this to the meeting on Monday, but I see it as a tool for us to use moving forward.

Thanks,
Sarah
